

As the general manager of two small radio stations, the proposed additional FCC requirements of recording programming will add even more undo cost and effort. The FCC has the view that this can be done by radio stations very economically and with very little equipment. This is not true. Any additional requirements just add to the littany of already taxing rules we must follow and puts us even at more of a disadvantage with our competitors who have no ruling authority, ie. local cable, local newspaper, etc.... Thank You.
